

Late Entered Services Report For Week Beginning 1/19/2014

State guidance has been issued which defines a late service as a seeker service entered more than seven days after service delivery or a service plan service (with related program enrollments) entered more than 14 days after actual start date of service. The state captures a picture of the services in the system each quarter and provides totals to the Federal Department of Labor (DOL). The quality and integrity of the state's data ensures compliance with Federal law and minimizes the risk to funds that make these WorkSource services possible.

Summary by WDA
